ARVIKON
SMART CARAVANING

2023 - 2024

SMART CARAVANING

YOUR VEHICLE'S SMART CONTROL SYSTEM REDEFINED.

INTERIOR TEMPERATURE CONTROL

Comprehensive climate control for recreational and professional vehicles, featuring user-friendly heating and AC adjustments, advanced fuel control, and real-time indoor/outdoor temperature monitoring with digital probes.

VEHICLE ENERGY CONTROL

Streamline energy control with real-time monitoring, advanced battery management, customizable consumption cutoffs, and expandable functionality. Enhance efficiency and convenience for diverse vehicle users and professionals.

VEHICLE WATER CONTROL

Master water control in your vehicles with precise level monitoring, flexible pump operation, advanced valve management, and comprehensive boiler system handling, ensuring optimal efficiency and performance.

VEHICLE LIGHTS CONTROL

Simplify vehicle lighting with centralized control, adjustable dimmable lights, smooth soft on/off transitions, customizable scenarios, and personalized icons for enhanced user experience.

VEHICLE FUSES CONTROL

Revolutionize vehicle management with programmable and resettable electronic fuses. Embrace an innovative, user-friendly system offering real-time monitoring of fuse status, current, failures, and power outages. Enhance safety and efficiency with this cutting-edge solution.

WARNINGS & NOTIFICATIONS

Keep an eye on all occurrences happening in the vehicle with a complete listing including warnings, alarms, and malfunctions. Get detailed information on malfunctions with CI-BUS compatibility.

USER MANUALS

Access all user manuals for equipment on board with ease through our database. Manuals are available in multiple languages with options to zoom and navigate the file.

SMART CARAVANING™ APP

Unlock the future of caravanning!
Real-time monitoring, remote control
and much more!
